Two benefits in one!

Simple,
Smart,
and Convenient
take care of it all
at once!

Wait! When it comes to **collagen**, don't forget this one thing!

Fact Chck 1

As we age, collagen synthesis decreases!(In your 40s, it's half that of when you were 18)
What happens when collagen production drops?
The skin becomes thinner and loses elasticity.

Fact Chck 2

When you think of collagen, do you think of pork skin? Its large molecular size leads to low absorption!
Low-molecular-weight fish collagen (with smaller Dalton size) enhances absorption.

Fact Chck 3

Is fish collagen hard to consume due to its distinct fishy taste, despite its high absorption rate?
Contains pomegranate and goji berry to neutralize the fishy flavor.

Fact Chck 4

Is collagen more effective when taken with other vitamins?
Collagen works better when consumed while maintaining a certain level of vitamin C in the bloodstream.
